"By working hand-in-hand with PNCT and the city of Newark, our seaport is now home to a large solar energy project capable of ...

Learn how terminals are embracing renewable energy, highlighting solar, wind, electrification & grid resilience with LBCT.

The Port Authority of New York and New Jersey and Port Newark Container Terminals (PNCT), marked a milestone with the ...

At the Port Newark Container Terminal in New Jersey, solar panels have been shoehorned into a tightly packed, high-traffic shipping facility, without disrupting operations or ...

In short, you can indeed run power to a container - either by extending a line from the grid or by turning the container itself into a mini ...

The solar project consists of one roof-mounted and nine carport canopy solar photovoltaic (PV) arrays, allowing for significant solar generation without intruding on terminal operations.

Standard Solar installed the project, which is made of rooftop installations and solar canopy systems to avoid taking up ground space in the bustling port. The project provides ...

Located on the Newark Bay in Port Newark, N.J., PNCT serves as a principal container shipping facility for goods entering and leaving the New York/Newark metropolitan ...
