By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the ...

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant ...

By deploying floating solar technology, the project makes use of lagoon surface area rather than scarce land, helping to overcome space constraints while unlocking new ...

In Seychelles, French developer Qair, has been selected to develop the largest floating solar power plant to be installed on saltwater in the world. The 5MW plant will be the first project led ...

As a floating solar PV project, it also offers an innovative solution to the land constraints faced by island nations like Seychelles, unlocking clean energy generation without ...

Once completed, Seychelles will have built the world's largest salt-water floating solar plant. The project, which has been seven years in the making, will see the installation of ...

By mid-2025, Seychelles is poised to take a significant leap in renewable energy with the launch of its first floating solar farm--the largest in Africa.

The project is basically the installation of a 4 MW Floating grid connected solar PV plant located at the Lagoon at Providence. This project is an IPP project and will be Africa's first utility-scale ...

enclosure bodies, semi-integrated, and fully integrated

Qair has launched construction of the Seysun Lagoon floating photovoltaics plant in the Seychelles.

Turn well water into convenient tap water, which can be connected to water heaters, solar energy, flush toilets, wash clothes, irrigate farmland, and flush farms.

As the first IPP utility-scale project in Seychelles and one of the largest floating solar PV projects in Africa, it represents a significant milestone for the region.
