Small compact systems designed in a purposeful way are intended for water treatment in remote areas, in small towns, production plants, in the sites of temporary assemblies, camps and farms.

The structure of the facility is very well suited for testing new technologies and innovative solutions in water treatment and environmental engineering. The facility is designed ...

Stockholm Water Technology (SWT) is a Swedish cleantech company with a patented solution for water purification, which is smart, energy saving and energy storing ...

Adding Containerized Battery Energy Storage System (BESS) to solar, wind, EV charger, and other renewable energy applications can reduce energy costs, minimize carbon footprint, and ...

Our containerised sewage treatment plant (STP) is made for easy setup and relocation. This solution is ideal for remote locations such as mining camps and oil rig sites.

Functioning as sophisticated "energy buffers," BESS Containers store surplus solar energy during periods of high irradiance. When solar generation dips, these systems seamlessly release ...

Kappalaverket is one of the world's most efficient wastewater treatment plants, treating wastewater from more than 500,000 inhabitants in Stockholm. Here, the purification process is ...

The reliability of energy storage systems is crucial for ensuring they meet the demands of water treatment facilities. Methods to assess reliability include evaluating the ...

Just last month, Stockholm unveiled Northern Europe's largest lithium-ion storage array - 150 connected
