Can off-grid cold storage improve food and health security?

Source: Authors. Enhanced SHS designed to power off-grid cold storage can help improve affordable food and health security by using clean and renewable energy generation. This innovative approach can also address several goals of the United Nations 2030 Agenda for Sustainable Development.

How can solar off-grid cold storage improve cooling efficiency?

By combining cold storage approaches with TES systems, such as low-cost PCM, cooling efficiency can be enhanced, allowing the solar off-grid cold storage to keep its stored food refrigerated even at night time. This reduces the use of expensive and short-life batteries or even eliminates their need.

What are autonomous solar PV off-grid home systems?

The development of autonomous solar PV off-grid home systems, also known as solar home systems (SHS), and mini-grids are promising solutions to tackle the low access rates of off-grid appliances in remote locations in developing countries [,,,].

SCU provided a 1MWh/200kW energy storage system off-grid solution for a hospital in Africa, which enabled the hospital to eliminate the high cost and noise problems of ...

For more than six years, Olufunke Bamidele and her family have used the Primary Health Care (PHC) Centre, in Lugbe, a community in Abuja, Nigeria's Federal Capital Territory ...

This research presents technologies that provide solar off-grid cold storage to houses, health centers, retail shops (off-grid refrigerators), and small farms or street markets ...

Since installing 436 solar panels this year, the 250-kilowatt solar power system has consistently kept medical devices running, medications refrigerated and enabled emergency ...

Presented in this study is an optimal hybrid renewable off-grid energy system model that supplies a typical rural healthcare center across the six regions in Nigeria.

SophiA's multifunctional systems will use photovoltaic panels, solar thermal modules, water purification and natural low global warming potential refrigerants in a cascade refrigeration ...

In response to the urgent need for stable, round-the-clock electricity in a private hospital facility in Abuja, Nigeria, our team designed and deployed a robust 10kVA solar power system tailored ...

Presented in this study is an optimal hybrid renewable off-grid energy system model that supplies a typical rural healthcare center ...

SCU provided a 1MWh/200kW energy storage system off-grid solution for a hospital in Africa, which enabled the hospital to eliminate the ...

Designed specifically for off-grid communities, this mobile clinic ensures uninterrupted medical services by harnessing solar energy, eliminating dependency on ...

In Nigeria, where rising fuel costs and unreliable grid power are daily challenges, hospitals and clinics face immense pressure to keep operations running smoothly. Solar power ...

Designed specifically for off-grid communities, this mobile clinic ensures uninterrupted medical services by harnessing solar energy, ...
