What is a LiFePO4 battery pack?

The actual size and shape of a LiFePO4 battery packs can vary based on the equipment expected to power. One of the most common forms these batteries take is that of large blue brick, connecting to the object they provide energy to with a small cord.

Are LiFePO4 batteries good for emergency lighting?

Emergency lighting - In buildings that utilize emergency lighting systems for situations like blackouts, it's not uncommon to find LiFePO4 batteries as the power source. The fact they pack so much punch in such a small form while not relying on an electrical grid for energy makes them a good option for all kinds of emergency supplies.

Can you use a LiFePO4 battery inside a solar lamp?

Solar lamps - Given how easily LiFePO4 batteries are able to recharge, this makes them an excellent choice to use inside a solar lamp. Whether it's inside or out, these batteries can easily use the energy of the sun to keep their lamps lit.

Can a car run on a LiFePO4 battery?

Mobile homes - While an RV's engine still tends to run on gas, many of its secondary electric functions could power by a LiFePO4 battery pack. Given how little space they take up and how easily they recharge, they're also a common power source for cars that run entirely on electricity, too.
