Given the right energy management solutions, bidirectional charging, or V2X, could add significant storage capacity for these ...

In the capital of the German state of Bavaria, an innovative system for sustainable energy generation and at-source output is currently being used at Munich Airport. The all-in ...

Airport operator Fraport is converting fleet vehicles at Frankfurt Airport (FRA) to act as electric mobile storage units, utilising energy from dormant electric vehicles to power its ...

The aim of the project was to optimise the geographical and temporal distribution of surplus energy from renewable energy systems (RE ...

In cooperation with Munich Airport, the mobile energy container is being used to charge electric vehicles. The project will run for 12 months. The energy container is located in ...

When county staff aren't using the Leafs for work activities, the vehicles plug into Fermata Energy's FE-20 bidirectional chargers. These specialized units can charge at 20 kW ...

At Frankfurt Airport, the charging infrastructure for electric vehicles will be used bidirectionally in the future. The airport operator, ...

"Frankfurt Airport is providing an ideal, self-contained field test system for implementing a bidirectional charging infrastructure," explains Michael Kuschel, the Fraport ...
