These developments - spanning natural gas, electricity and renewable energy - will enhance Algeria's energy exports to Europe and expand its domestic capacity.

Algerian state firm Sonatrach on 15 August signed a \$210mn EPC deal with the energy engineering subsidiary of Chinese state giant CNPC for three gas compression trains ...

With 84% of electricity still from fossil fuels [1], the country's racing against its 2035 target to install 15GW of solar capacity. But here's the kicker: without proper storage containers, those shiny ...

The project, known as Phase III Boosting, Stage 2, aims to offset natural depletion and maintain production levels at 188 million cubic meters per day, Sonatrach said. The ...

Baker Hughes' awarded scope includes the supply of 20 compression trains based on Frame 5 gas turbine and BCL compressor technology, which will be installed across ...

Baker Hughes was awarded a contract from Sonatrach for a gas boosting project for the Hassi R'Mel gas field in Algeria. The awarded ...

ALGIERS, December 3, 2024 - Algeria's Sonatrach has commenced a USD 2.33-billion project to upgrade facilities at the giant Hassi R'Mel gasfield, Upstream Online reported on Tuesday. ...

Baker Hughes was awarded a contract from Sonatrach for a gas boosting project for the Hassi R'Mel gas field in Algeria. The awarded scope includes the supply of 20 ...

The future outlook for the Algeria Energy Storage Market appears promising, with a growing focus on

renewable energy integration and grid stability driving the demand for energy storage ...

ALGIERS, December 3, 2024 - Algeria's Sonatrach has commenced a USD 2.33-billion project to upgrade facilities at the giant Hassi R'Mel gasfield, ...

The In Salah CCS project in central Algeria is a world pioneering onshore CO₂ capture and storage project which has built up a wealth of experience highly relevant to CCS projects ...

The project is needed to boost pressure and maintain production of the Alrar gas field at 353 MMscf/d (10 x 10⁶ m³/d). The ...
