How much does electricity cost in Armenia?

Armenia, March 2023: The price of electricity is 0.109 U.S. Dollar per kWh for households and 0.081 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

How is electricity generated in Armenia?

Armenia has sufficient electricity-generating capacity to meet current domestic needs, but electricity demand is projected to grow by up to three percent annually. Electricity in Armenia is generated primarily by the Armenian Nuclear Power Plant (ANPP), hydroelectric plants, and thermal plants.

How much solar power does Armenia have?

Newly tendered solar deals comprise 210 MW of capacity. The government expects solar PV capacity to reach 100 MW by 2024 and 1,000 MW by 2030. According to the MTAI, which oversees the energy sector, wind energy potential in Armenia is approximately 450 MW.

What are the energy reforms in Armenia?

The reforms went into effect starting February 1, 2022. The principal bodies involved in energy sector governance in Armenia include the Ministry of Territorial Administration and Infrastructure (MTAI), which is responsible for overall energy policymaking; the Ministry of Environment; the PSRC; and the Committee on Nuclear Safety Regulation (ANRA).
