On June 5th, Gresham House and Octopus Energy announced the agreement of a two-year tolling contract for 568 MW/920 MWh of battery energy storage capacity, amounting to nearly ...

In the Philippines, momentum is building. The Department of Energy's fourth Green Energy Auction (GEA-4) is the first to integrate energy storage with new solar capacity, which ...

It uses lithium iron phosphate batteries with high energy density, fast response time and high round-trip efficiency to maximise energy storage, making them suitable for maintaining grid ...

Meet the energy storage container - Southeast Asia's unsung hero in the energy transition. These modular powerhouses are reshaping how the region stores and distributes ...

As part of the MoU, MOL PLUS will support efforts to promote VFlowTech's VRFB technology within the maritime industry and identify additional opportunities for the practical ...

Asian countries are actively investing in renewables with solar, wind, offshore wind and hydro among the most utilised. The issue now facing many markets is stability.

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts ...

Structuring of the offtake agreements is likely to be particularly important for energy storage projects and will require a different approach than those for solar and wind projects.

It covers a wide range of issues and topics including but not limited to markets, technology, policy and
