EnergyVille is a collaboration between the Belgian research partners KU Leuven, VITO, imec and UHasselt in the fields of sustainable energy and intelligent energy systems.

French electric utility ENGIE SA has undertaken construction of a 200-MW/800-MWh battery energy storage system (BESS) at its Vilvoorde site on the outskirts of Brussels in ...

It is the site of the largest permitted battery energy storage system (BESS) on the continent at 2.8GWh, one of the largest under ...

This project demonstrates that for commercial and industrial (C& I) users facing power capacity expansion needs, SCU's energy ...

Summary: Mobile energy storage power supply vehicles are revolutionizing energy management in Brussels. This article explores their applications, benefits, and real-world impact while ...

This project demonstrates that for commercial and industrial (C& I) users facing power capacity expansion needs, SCU's energy storage system is no longer simply a ...

Energy storage systems will be fundamental for ensuring the energy supply and the voltage power quality to customers. This survey paper offers an overview on potential energy ...

French electric utility ENGIE SA has undertaken construction of a 200-MW/800-MWh battery energy storage system (BESS) at its ...

The technology group Wartsila will supply a 25-megawatt (MW) / 100-megawatt hour (MWh) energy storage
