The European Commission recently introduced a series of non-binding initiatives aimed at bolstering the continent's wind turbine manufacturers, who are facing mounting ...

Wind contributes 19% of Europe's electricity consumption and is considered integral to meeting 2030 and 2050 climate targets. As costs rise and competition from Chinese ...

As costs rise and competition from Chinese manufacturers intensifies, the EU is intent on accelerating wind development and bolstering energy security across the bloc.

With the Wind package, we are now doubling down on our efforts to accelerate deployment through increased predictability and faster permitting.

Last October the European Commission published its Wind Power Package which outlines 15 immediate actions to strengthen the competitiveness of Europe's wind supply chain.

The first support measures at the EU level came in the form of a wind power package presented by the Commission in late October.

The European Commission has published a European wind power action plan it claims will "ensure the clean energy transition goes hand-in-hand with industrial ...
