Once completed, the plant is expected to generate over 265 GWh of electricity annually, supplying power to more than 45,000 households and reducing carbon emissions by ...

Bulgaria's largest commissioned system to date is a 25MW/55MWh installation by Renalfa (June 2024), followed by an 18.7MWh project from China-based Sermatec. In ...

Eurowind Energy and Renalfa IPP started the construction of a 238 MW solar power plant there in 2023. They intend to subsequently integrate wind turbines and energy ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the potential for energy storage applications to ...

Bulgarian renewable energy company Vineli Re plans to build a wind and solar park, combined with electricity storage, local media reported, citing an investment proposal ...

In 2024, GSL ENERGY successfully installed a 7.45MWh industrial-grade BESS energy storage battery system in Bulgaria, ...

The latest white paper, prepared by Fluence in collaboration with APSTE, examines the current state of the Bulgarian energy market and the ...

Transformation of AES Galabovo into a large-scale energy storage facility using proven technology implemented in concentrated solar power plants (CSP) using molten salts

Bulgaria's Ministry of Energy is currently running two tenders aiming to commission 1,425 MW of solar and
