Should lithium batteries be shipped by air?

Regulations for shipping lithium batteries by air are in place to protect everyone who would come in contact with a lithium battery shipment while it is being transported as air cargo; with training being required for everyone in this supply chain, to protect the aircraft, and the people in the aircraft, that is carrying the batteries.

Does IATA offer a shipping lithium batteries by air course?

For proper training on dangerous goods including the Shipping Lithium Batteries by Air course, IATA offers a wide variety of safety courses to ensure you are competent in dealing with dangerous goods. This is required for all who participate in the shipping and handling of dangerous goods.

What happens if you don't ship lithium batteries in air cargo?

For example, one enforcement action imposed \$66,000 in civil penalties for improper transporting lithium batteries. Failure to comply may result in shipment rejection or legal action. These regulations help you safely ship lithium batteries and reduce fire risks in air cargo.

Are lithium batteries safe to ship?

Lithium batteries have the potential to be a source of heat, sparks, or even fire, so prescribed instructions for packing lithium batteries have been produced and implemented. Lithium battery shipments are subject to international packing and shipping safety regulations, and when not followed, fines and other penalties may be incurred.

Whether you're moving new electric vehicles by ocean, shipping lithium batteries by air, or storing components in between, we ...

This 2024 guide covers essential requirements for transporting both lithium-ion (UN3480) and lithium-metal (UN3090) batteries by air, sea, and ground, including UN38.3 testing, proper ...

This 2024 guide covers essential requirements for transporting both lithium-ion (UN3480) and lithium-metal (UN3090) batteries by air, sea, and ...
