How to choose a generator for a refrigerated shipping container?

Diesel, gasoline, and natural gas are good options. Generators can be really loud, so picking one with a low noise level is key. This is even more important if the generator is going to be used in your neighborhood. If you need to move your refrigerated shipping container around, it's best to go for a generator that comes with wheels.

What type of generator is used for refrigerated shipping containers?

o Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power. However, diesel generators can be noisy and expensive to operate.

How much power does a 20ft Reefer use?

So for a 20ft reefer, it would consume 1 gallon per hour. ($4 \text{ kW} \times .25 \text{g} = 1 \text{ gallon}$) and a 40ft reefer would consume 1.75 gallons per hour ($7 \text{ kW} \times .25 \text{g} = 1.75$). o Diesel generators: Diesel generators are the most common type of generator used for refrigerated shipping containers. They are reliable, durable, and can provide a lot of power.

What are the different types of Genset units used for reefer containers?

There are three main types of genset units used for reefer containers: clip-on gensets, under-mount gensets, and on-chassis gensets. Each type serves specific purposes based on transportation needs and logistical requirements. Clip-on gensets are portable units that attach directly to the front or chassis of the reefer container.

Choosing the right ISO container generator is no small feat. We're here to guide you through this process, highlighting key aspects that should influence your decision-making.

Discover how to select the best generator for refrigerated shipping containers to ensure reliable cooling.

Genset machines are purpose-built to power reefer containers and have the following features to help users:
