Batteries with grid-forming inverters can offer a virtual version of the grid service. The money for the Croatian BESS comes from the European Union's Modernization Fund, ...

The study will take into account the broader regional context and the accelerated growth of renewable energy sources, not only in Croatia but throughout Southeast Europe, ...

The Croatian government has prepared 500 million euros to install batteries for storing energy produced from renewable sources. Minister of Economy and Sustainable ...

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's ...

This article examines ATESS' pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, highlighting key projects across various factories ...

Croatia's journey toward 100% renewable energy relies on smart power generation and storage strategies. By combining solar/wind farms with cutting-edge ESS technologies, the country is ...

This battery storage system is pivotal for Croatia to achieve its renewable energy targets, particularly by smoothing out the intermittency of sources like wind and solar.

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time ...

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint ...

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established ...

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the ...
