Croatia possesses significant renewable energy potential, primarily due to its abundant resources in hydropower, wind, geothermal, and solar energy. Despite limited domestic reserves of fossil ...

By the end of 2021 renewable energy in Croatia is expected to generate around 1060 MW from Wind and Solar alone or around 32% of all energy consumption from renewable energy ...

Croatia recorded a landmark year for renewable energy in 2025, with solar, wind and renewable thermal power sources taking a leading role in the national electricity system ...

Croatia's electricity system reached a defining moment last year, with biomass and biogas facilities playing a crucial role alongside solar and wind power to deliver a landmark ...

Its ambitious goal for Croatia, to source all electricity from renewables by 2030, is based on a shift to solar and wind energy, as well ...

Its ambitious goal for Croatia, to source all electricity from renewables by 2030, is based on a shift to solar and wind energy, as well as investments in the transmission network. ...

This study analyzes the record electricity consumption in Croatia during the July 2024 heatwave and evaluates how the increased deployment of onshore wind and solar ...

Central and Eastern Europe (CEE)-based developer and independent power producer (IPP) Woodburn Capital is deploying a co-located battery storage project in Croatia, with final ...

Croatia's renewable energy sector is booming. Discover how new policies and investments are helping its solar capacity surpass 1 GW by 2025, with a target of 2.5 GW by ...

Croatia experienced accelerated growth in renewables over the past year, yet the sector faces critical bottlenecks. By the end of 2024, the country had reached 3.8 GW of ...

Croatia's journey toward 100% renewable energy relies on smart power generation and storage strategies. By combining solar/wind farms with cutting-edge ESS technologies, the country is ...

Croatia's renewable energy sector is booming. Discover how new policies and investments are helping its solar capacity surpass 1 GW ...
