Who dominates the 5G market in Finland?

The 5G market in Finland is dominated by three key players, Elisa, Telia, and DNA. The coverage of 5G in the country is challenged by a vast contrast between urban and rural areas.

Is Finland covered by a 5G network?

Half of Finland's population is soon to be covered by a 5G network. While 5G networks are constructed and consumers adopt 5G phones in increasing numbers, the application of the new technology in industry and business is making progress.

How many mobile networks are there in Finland?

Meanwhile, mobile networks offering speeds of 300 Mbps were available to 60% of households in about 1% of Finland's land area. 5G base stations, which numbered almost 3,000 in total, could be found in 109 municipalities. At the same time, 100 Mbps 4G networks covered 17% of the land area and 93% of households.

What was the purpose of 5G Finland?

5G Finland was set up to create and pilot applications and services enabled by 5G. The network of 100 companies and 300 people was active during 2017-2020.
