Is Kuwait a sustainable country?

Part of Kuwait's sustainability vision is to increase the share of renewables in its energy mix to 15% by 2030. A major project to achieve this goal is the planned Subiya solar PV water storage plant in Al Jahra with a generating capacity of 30MW, which will start its construction phase in 2023 and enter commercial operation in 2025.

How can Kuwaiti companies reduce energy costs?

With the digitalization and automation solutions offered by the company, Lafhail estimates that Kuwaiti companies can reduce their energy costs by up to 90%, a percentage that, if achieved, represents an environmental saving that reduces carbon emissions into the atmosphere.

Why is sustainability important for Kuwait's petrochemical industry?

Sustainability has become the key for Kuwait to mitigate the environmental impact of its oil production, an economic activity that accounts for approximately 43% of its GDP. Kuwait's petrochemical industry, with the massive Al Zour refinery as its flagship, will remain one of the most important in the world according to the Vision 2035 roadmap.

Align-ing with Kuwait's goal to generate 15% of the total demand from RESs and aiming to diminish harmful GHG emissions associated with the electrification process, an of-grid HRES ...

Aligned with Kuwait's commitment to sourcing 15% of its electricity from renewable sources by 2030, this project sprawls across an expansive 84 km² in the arid Al Shagaya ...

Summary: Kuwait City's shared energy storage project aims to revolutionize renewable energy adoption in the Middle East. This article explores its technical framework, economic benefits, ...

To simulate Kuwait's energy future, this study employed the MESSAGE model to evaluate scenarios ranging
