---

G7 environment ministers committed on Tuesday to ramp up the production and deployment of battery storage technology, an essential component for increasing renewable energy and ...

G7 countries are set to agree a global target this weekend to increase electricity storage capacity sixfold from 2022 to 2030, as countries grapple with how to keep the lights on ...

To meet the goal of tripling global renewable energy capacity by 2030, a six-fold increase in battery storage is required. This ambitious target aims to reduce emissions from ...

The G7 also committed to a quantitative global goal to increase energy storage in the power sector to 1500 GW in 2030--a more ...

G7 environment ministers pledged on Tuesday to accelerate the development and adoption of battery storage technology, recognizing its crucial role in advancing renewable ...

G7 nations have agreed a new global energy storage target of 1500GW by 2030, a six-fold increase from today's levels. The new target for cumulative deployments was agreed ...

The G7 said Tuesday it would not only support more production and use of battery storage, but promote technological advancements in the sector as well as grid infrastructure.

In an early draft seen by the Financial Times, the G7 will "promote the development and deployment of stationary battery storage to increase storage efficiency and reduce storage ...

The G7 said Tuesday it would not only support more production and use of battery storage, but promote technological ...

The G7 Energy Ministers' Meeting concluded with a clear mandate for a rapid power sector transition, committing to a sixfold increase in global energy storage to 1,500 GW ...

The G7 also committed to a quantitative global goal to increase energy storage in the power sector to 1500 GW in 2030--a more than six-fold increase from 230 GW in 2022.

TOKYO -- The Group of Seven major industrialized economies aim to increase global electricity storage capacity 6.5-fold by 2030, according to a draft joint statement of energy ministers, in...
