First industrial scale solar thermal power project has been initiated by inauguration of Hassi R'Mel power station in 2011. This new hybrid power plant combines a 25-megawatt (MW) ...

To enhance efficiency, the La Trinidad plant will use single-axis trackers to follow the sun's movement throughout the day. The facility ...

El Salvador has the capacity to install more than 1,200 megawatts of power with renewable generation plants, according to a study by the Central Reserve Bank (BCR).

This one-of-a-kind energy project, which is bigger in area than the entire country of El Salvador, has the potential to revolutionize renewable energy generation at scale.

AES El Salvador currently has 16 generation plants: one based on biogas and 15 solar plants. Together, these plants avoided the emission of over 245,000 tons of CO₂ into the ...

To enhance efficiency, the La Trinidad plant will use single-axis trackers to follow the sun's movement throughout the day. The facility is expected to generate 188,000 MWh ...

The new solar plant will benefit more than 2 million users across the national power grid and is expected to reduce approximately 20,000 tons of CO₂ emissions per year, ...

According to statistics from the Latin American Energy Organization (Olade), El Salvador has experienced a 160-fold increase in its solar power generation capacity from 2015 ...

According to statistics from the Latin American Energy Organization (Olade), El Salvador has experienced a
