This project not only represents a highly effective, tailored, and scalable sustainable solution for the construction industry in Ghana, but also provides us with valuable learnings that we can ...

The new plant located in Tema, which is the world's largest LC3 plant, provides a homegrown solution to the clinker problem by tapping into Ghana's abundant raw material ...

This will be Ghana's first hybrid plant utilizing both solar and hydro resources to generate and supply power to the national grid. In October 2019, construction commenced on the first phase ...

This will be Ghana's first hybrid plant utilizing both solar and hydro resources to generate and supply power to the national grid. In October 2019, ...

An innovative and efficient solar power plant solution has been developed for cement factories. On an annual basis, solar PV systems in cement plants may save 22,941 tonnes of CO₂.

In the present work, the authors have attempted to design a solar cement plant for supplying solar energy to the cement industry. A case study was done, which investigated a ...

An innovative and efficient solar power plant solution has been developed for cement factories. On an annual basis, solar PV systems in cement plants ...

The Bui Power Authority (BPA) has completed the construction of a 5MW floating solar photovoltaic (FSPV) power plant on the Bui ...

Projects utilizing floating solar technology are increasingly recognized as an innovative solution to land
