What is the largest solar project in Greece?

One of the company's flagship projects is the 10 MWp photovoltaic (PV) plant in Crete, which is one of the largest solar projects in Greece. The plant consists of more than 37,000 PV modules and generates enough energy to power more than 5,000 households. The project was completed in 2011 and has been operating successfully ever since.

Is Greece a good place to invest in solar energy?

When exploring the Solar Energy industry in Greece, several key considerations should be taken into account. The country benefits from abundant sunlight, making it an ideal location for solar power generation. Regulatory frameworks support this, with the Greek government promoting renewable energy through various incentives and subsidies.

Why is Akuo a good investment for Greece?

In Greece, as in many other parts of the world, storage solutions and their ability to provide grid services are essential for energy transition. Akuo is one of the worldwide pioneers in this segment and intends to develop assets to bring this high level of expertise to Greece.
