Insulated containers protect enzymes, cells, reagents, and solutions by maintaining a constant temperature while on the laboratory bench, during transport, and in storage.

Extreme-temperature process totes and lids withstand large fluctuations and differentials in temperature. They store and cover hot items during transport from a production line.

Our insulated foam containers are manufactured with the highest degree of quality and integrity. They are excellent shipping containers for everything from Biotechnology, Genetic ...

These modular container labs are ideal for environmental monitoring, clinical trials, and remote data collection, offering 20 ft. containers that are weather-resistant, quickly ...

These polypropylene totes are chemically resistant to acids, alkalis, oils, and detergents. The tough, smooth surface won't chip and is mildew-proof.

Browse a full range of Insulated Containers products from leading suppliers. Shop now at Fisher Scientific for all of your scientific needs.

High temperature resistance: the reagent bottle is made of high-temperature resistant transparent plastic, ensuring the stability and safety of reagents in high-temperature ...

ThermoSafe Durable Insulated Containers maintain critical temperatures for your laboratory specific materials and dry ice storage. These rugged temperature sensitive bulk storage ...
