What's new at Honiara Power Station?

The new station has been commissioned and is currently in operation. Furthermore to improve the reliability Solomon Power invested in a new 11 kV switchboard, two 1.6 MW diesel generators and two new power transformers at Honiara Power Station. 2.

Where is the Honiara substation located?

The Honiara substation is located in the heavily populated central part of the Honiara urban area. The site is completely fenced with restricted access and heavily developed with buildings housing diesel generators and ancillary machinery/equipment, office, storage and several SP staff houses.

Who owns the Honiara substation?

Honiara sites Two SP owned and operating substations - Honiara substation and the Honiara East substation - will be installed with BESS together with grid-forming battery inverters. The Honiara sub-station was transferred to public ownership in 1978 with registration documents available to confirm this ownership.

How much storage capacity will be installed at the Honiara Power Station?

Subproject 1b will install an approximate 4 MW / 4 MWh of storage capacity at the Honiara Power Station, adjacent to an existing 11kV switchboard where electrical integration will occur. Another 5 MW / 20 MWh BESS will be installed with grid-forming battery inverters at the Honiara East substation.

Our recovery plans that will result in the ceasing of the load shedding by October are on track. Below are some photos of the works currently being done on two of the ...
