How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

What is the European 5G Observatory?

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing agreements. Source: IDATE estimates and regulators' data. Reporting period: at December 2024. Source: IDATE estimates and regulators' data.

Why is China a leader in 5G infrastructure?

With over 1.2 million base stations installed, the company has played a key role in making China the global leader in 5G infrastructure. This massive rollout has enabled widespread adoption of 5G-powered applications, from smart manufacturing to AI-driven city planning.

What is a 5G base station?

They help fill coverage gaps, improve network reliability, and handle high data traffic. In cities, more than 60% of 5G base stations are small cells, placed on rooftops, lampposts, and building facades. These mini base stations are crucial for delivering consistent 5G speeds in crowded areas like stadiums, shopping malls, and business districts.

As of 2024, Germany had the most 5G base stations among European Union (EU) member states, with over ***** base stations installed.

This map represents the coverage of BASE 2G, 3G, 4G and 5G mobile network in Vienna. See also : BASE mobile bitrates map in Vienna, and mobile networks coverage in Vienna.
