What is a solar pole top light?

This solar pole top light is a unique, all-in-one design. It's fully integrated and offers 5W-20W of LED power. It is designed to mount onto an existing light pole (3" diameter) or use with a tenon for other sized poles. It is ideal for general area lighting.

How tall is a solar pillar light?

This solar outdoor pedestal lighting stands 10.5" tall and can be installed on any solid level surface. It is an accent light that will spread a low level of light in the area that it is installed. This solar-powered driveway pillar light is designed for accent lighting purposes. The lamp is 10.5" tall.

How many lumens does a 38W solar panel have?

The 38W solar panel is neatly integrated. Our PL23 solar pole top light offers 20W of LED power which is 2,600 lumens at full power. All components are built into an attractive and easy-to-install light fixture that can be installed onto an existing light pole. Eliminating the need for expensive cable trenching and the monthly associated costs.

How does a solar lamp post light work?

SOLAR POWERED: A solar lamp post light has four high-efficiency solar panels that convert more sunlight, ensuring longer working hours. The built-in light sensor automatically activates the outdoor lamp at dusk and charges it during the day. Not only does it save you electricity bills but also offers convenient lighting.
