How much does a Chinese inverter cost?

With April's import duties, Chinese inverter prices have climbed by roughly a third. For example, a Chinese string inverter that was \$0.15/W may now be offered around \$0.20/W (reflecting the 34% duty). In absolute terms, a 5 kW (5000 W) inverter unit that cost \$1,000 might increase to ~\$1,330 after tariffs if sourced from China.

How will April tariffs affect inverters & solar panels?

Overall, while the solar panel price spike is the most pronounced effect of the April tariffs, inverters are seeing a noticeable cost increase as well, on the order of a few cents per watt.

How much does a 5 kW inverter cost?

In absolute terms, a 5 kW (5000 W) inverter unit that cost \$1,000 might increase to ~\$1,330 after tariffs if sourced from China. European and other foreign-made inverters also nudged upward but less dramatically; a high-end German SMA inverter that sold for, say, \$0.20/W might rise to ~\$0.24/W with the 20% EU tariff.

Which solar companies do not incur import tariffs?

Other "Domestic" Suppliers: A few manufacturers with U.S.-based production or assembly - such as Hanwha Qcells (Georgia factories), First Solar (Ohio), Mission Solar (Texas), and Silfab (Washington) - do not incur these import tariffs on their U.S.-made panels. They have an effective price advantage now.
