This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, and the promising yet challenging road ahead.

TEHRAN - Iran is negotiating with several Chinese companies to develop solar power plants and battery energy storage systems (BESS) as part of efforts to boost renewable ...

(MENAFN) Iran's Small Industries and Industrial Parks Organization (ISIPO) has announced the approval of 24 specialized industrial parks dedicated to solar energy, with four ...

This article explores the project's technical breakthroughs, its impact on Iran's power sector, and why hybrid solar-storage solutions are becoming essential for modern grids.

Emerging markets in Africa and Latin America are adopting mobile container solutions for rapid electrification, with typical payback periods of 3-5 years. Major projects now deploy clusters of ...

Many solar firms have described Iran as a tough country to do business in, so putting up the first ever large-scale plants came with some unique challenges.

Due to solar PV and wind capacity distributed across large areas and multiple locations, expanding the grid would allow renewable energy projects to connect and deliver power in the ...

Iran's arid and semi-arid climate necessitates innovative strategies to address interlinked water and energy challenges. Floating solar photovoltaic (FSPV) systems offer a ...

Talks include provisions for transferring technical knowledge on storage systems to Iranian companies alongside joint solar development efforts. This cooperation aims to ...

This post explores the current state of Iran's new energy market, recent policies, key case studies in solar PV and energy storage, ...

This large-scale solar project is expected to significantly reduce greenhouse gas emissions and shrink Iran's carbon footprint. By shifting away from fossil fuel-heavy industries, ...
