Does Ottawa have a battery energy storage plan?

In 2025, the City of Ottawa established official plan and zoning provisions for battery energy storage uses in accordance with new Official Plan policy. BESS is an emerging technology using batteries and associated equipment to store excess energy from the electrical grid, which can then discharge energy in periods of high demand.

Is a massive energy storage facility coming to Ottawa?

[Image &#169; City of Ottawa] A massive energy storage facility to be located in rural west-end Ottawa was recently approved by city council, but remains a contentious project among locals in the area.

Is battery energy storage the best way to meet Ontario's growing electricity demand?

Battery energy storage is the most affordable, lowest-emission path to meeting Ontario's growing electricity demand and delivering a reliable power supply in rural Ottawa, and it can get the job done with a laser focus on safety, concludes a new analysis by Dunsky Energy +Climate released Thursday.

Is Ottawa looking at regulatory changes around battery energy storage facilities?

Ottawa is looking at regulatory changes around these types of facilities. (Ross D. Franklin/The Associated Press) UPDATED: City councillors unanimously approved the new rules for battery energy storage facilities at their meeting on Feb. 12, 2025.

The South March battery energy storage system (BESS) in Ottawa's West Carleton community will store unused energy for future use, gathering electricity during off ...

Facilities that successfully demonstrate their capabilities will be contracted by mid-2024, with operations starting on or before May 1, 2028. The Ottawa ...
