What is a solar inverter?

A solar inverter is the part of the energy storage solar system that converts direct current from solar modules into alternating current. Different types of solar systems require different types of inverters, and we supply top-of-the-line solar inverters for efficient performance.

What is a string inverter?

As the name implies, string inverters connect a set of solar panels, also called a string, to a singular inverter. The inverter will convert the DC electricity from every solar panel connected to that string.

Which solar inverter is best?

CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2025. It was the most efficient inverter we looked at, letting you use a larger percentage of the energy your solar panels generate. This translates to less and more power to use around the house.

How much does a solar inverter cost?

Your solar adventure starts here--let's light it up! The Enphase IQ8 is a top pick for its reliability, panel-level optimization, and 25-year warranty--especially great for shaded or complex roofs. Solar inverters cost between \$1,500 and \$5,000, depending on the type (string, micro, or hybrid) and your home's energy needs.

I've scoured specs, homeowner feedback, and industry trends to bring you the top 12 solar inverters for US homes this year. We'll dig into what each one offers, who it's perfect ...
