As Mexico accelerates its energy transition, Battery Energy Storage Systems (BESS) are rapidly emerging as a cornerstone of the country's power strategy.

Through specific regulations, mandatory requirements for renewable energy-integrated energy storage, and long-term planning, Mexico is becoming a benchmark case for ...

Mexico's new regulation mandating battery systems for solar and wind projects positions it as a model for energy storage integration in Latin America, according to a new report.

According to Jorge Islas, Deputy Minister of Energy Planning and Transition, all new intermittent renewable energy plants will require 30% of their capacity in batteries, with the batteries ...

The plan targets the addition of 24,954 MW of new clean capacity by 2030, with 5,000 MW dedicated to battery energy storage systems (BESS) to manage the intermittency of ...

Mexico's energy sector is undergoing a major transformation, with energy storage playing a crucial role in its future. The newly established regulatory framework sets the ...

Mexico's new 30% battery storage mandate is set to transform the renewable energy sector. Learn how this policy impacts grid stability, private investment, and the future of ...

As renewable energy projects in Mexico continue to expand, new requirements have been introduced to enhance grid stability. Under a recent directive, all wind and solar energy ...

Future wind and solar energy projects in Mexico will be required to collocate battery energy storage systems
