Underwater data centres powered by offshore wind, solar and wave energy, and cooled by seawater systems, offer a route toward zero-carbon artificial intelligence.

The hybrid energy containers consisting of solar and fuel cell technology offer safe and environmentally friendly power generation for remote areas such as offshore wind farms.

Mayor Adams first announced an agreement between NYCEDC, Equinor, and SSBMT (a partnership between Industry City and the Red Hook Container Terminal) to ...

We establish a reliable and redundant TETRA connection between all vessels, turbines, the offshore substation, the onshore office and helicopters to enable direct calls.

This large-capacity, modular outdoor base station seamlessly integrates photovoltaic, wind power, and energy storage to provide a stable DC48V power supply and optical distribution.

The hybrid energy containers consisting of solar and fuel cell technology offer safe and environmentally friendly power generation for remote areas such ...

In view of the special needs of the communication system, a communication system scheme for offshore wind farms based on 5G technology is proposed.

Can a solar-wind system meet future energy demands? Accelerating energy transition towards renewables is central to net-zero emissions. However, building a global power system ...

I'm honored to stand alongside Mayor Adams, NYSERDA, and Equinor as we break ground on the South
