---

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

In Q1 2025, China's wind and solar capacity surpassed its thermal (coal and gas) capacity for the first time, supplying nearly 23% of the country's total electricity consumed, up from roughly ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to harness the region's bright sunshine, cold ...

The world's largest cluster of solar farms can be found in Qinghai, China, high on the remote Tibetan Plateau. It's far bigger than the USA's largest solar farm, and it's one of several ...

China has connected the world's first 1-GW offshore solar farm to the grid, a plant off Shandong set to generate 1.78 TWh per year.

China is changing the world's power game. In May 2025 its solar farms made over 100 terawatt-hours (TWh) in one month. That is about one-third of all the power the United ...

China is building an enormous network of clean energy industries on the Tibetan Plateau, the world's highest. The intention is to ...

Chinese officials recently unveiled plans for what they claim will be the world's largest solar farm, spanning an immense 610 square kilometres (235 square miles) - roughly ...

Rapid construction of photovoltaic (PV) solar projects across China's largely arid northern and western provinces has skyrocketed China to certify itself as the world leader in ...

According to Electrek, China's 3 gigawatt Mengxi Blue Ocean Photovoltaic Power Station in the vast, remote Gobi Desert came online in early November. The plant is located in ...

The world's largest 1 GW offshore solar farm located off the coast of Dongying, Shandong Province, China is now connected to the grid.
