Portugal will invest \$480 M (EUR400 M) to strengthen grid stability and scale battery storage, aiming for 750 MW of BESS capacity after Iberian blackout.

Hyperion's first battery storage projects in Portugal, located in Estremoz and Evora. Co-located with solar PV plants, enabling energy to be stored during peak production ...

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store ...

Portugal's electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward ...

Alcoutim solar plant will be able to store energy in periods of excess production to sell it to the grid when it is most needed, maximizing its value. The battery system, in sunny ...

The renewable energy landscape in Portugal is moving into a new phase, marked by stronger commitments from international investors and the integration of storage ...

Portuguese energy giant GALP has announced construction of five battery projects, with a total capacity of 74 megawatts (MW), to store solar energy in Spain and Portugal.

Portugal's electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward a more nuanced goal: pairing panels and ...
