How much do commercial solar panels cost?

Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt. There is a lot to consider when figuring out how much you'll spend on a solar installation.

How much does it cost to install solar panels?

Multiple pieces of equipment, such as racking, wiring, and inverters, must be installed so the solar panels can power your home. Solar panels and other equipment: Believe it or not, solar panels make up just 12% of total installation costs on average, with one solar panel costing about \$200 before installation costs are considered.

How much does a solar system cost?

On average, solar panels cost about \$9.34 per square foot of your home's total living space. This means a solar system costs about \$13,075 for a 2,000-square-foot house, including the solar tax credit. Note: Using square footage to estimate home solar system costs only offers a rough guide and will not provide a truly accurate price.
