-----  
How much does a 20 foot container cost in India?

A 20-foot dry container in India typically costs INR1.6-INR2.0 lakh for new units and INR0.8-INR1.2 lakh for used units, depending on the condition, port, and supplier. Prices may vary slightly at major ports such as Nhava Sheva, Mundra, and Chennai due to local handling charges.

2. What is the price of a 40-foot container in India?

Where to buy a container in India?

Major ports such as Mumbai (Nhava Sheva), Chennai, and Mundra have higher availability and competitive prices. Inland depots (ICDs) such as Tughlakabad, Nagpur, or Kanpur may add INR10,000-INR25,000 per container for repositioning and handling. Containers sourced near ports are typically 10-15% cheaper than those purchased inland.

What are the different container types in India?

In India, the most common container types are 20-foot and 40-foot units, designed to suit different cargo requirements and trade volumes. The 20-foot (TEU) container is the industry standard for small to mid-sized shipments. It's compact, cost-efficient, and suitable for businesses shipping moderate cargo volumes.

How does depreciation affect container prices in India?

Container prices are often benchmarked in USD. With the rupee averaging INR87.9 per USD in late 2025, any depreciation directly raises container import or leasing costs. Even domestic resellers adjust pricing to account for global USD-indexed trade values, which means Indian buyers indirectly absorb exchange-rate risk.
