What is a residual current circuit breaker (RCCB)?

Eaton's premium range of residual current circuit breakers (RCCB) provide ultimate protection from trips and electrical leakage currents of up to 100 amps. Protect human life and vital equipment from dangerous current with a residual current circuit breaker to rapidly disconnect power when faults are detected. Discover the full portfolio below.

What is a residual current circuit breaker?

A residual current circuit breaker must be used in conjunction with a miniature circuit breaker (MCB). RCCBs are the safest device for protecting against earth currents and are utilised across an array of applications. They operate by quickly and automatically cutting off a power supply when unbalanced electric currents are detected.

What does a RCBO do?

They will disconnect the circuit when the current becomes unbalanced, protecting both people and equipment. RCBOs are available in a large range of different breaking capacities and can be used in applications from industrial fields to home appliances.
