**BESS:** A stationary energy storage system using battery technology. The focus of the database is on lithium ion technologies, but other battery technology failure incidents are included.

The establishment of energy storage stations is a complex task that requires meticulous planning and execution across multiple stages. Each phase, from site selection to ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions past the total installed ...

US developers of large-scale battery storage stations have 18.7 GW of new capacity under construction, according to S& P Global Energy Market Intelligence data, ...

The guide covers the construction, operation, management, and functionalities of these power stations, including their contribution to grid stability, peak shaving, load shifting, and backup ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. battery storage already achieved record ...

ALBANY -- The New York State Public Service Commission (Commission) today confirmed granting the construction and operation of a battery-based energy storage facility with a ...
