Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

Do solar inverters contain undocumented cellular radio devices?

These inverters, which are essential components that convert direct current from solar panels into alternating current usable by the electrical grid, were found to contain undocumented cellular radio devices not disclosed in product specifications or technical documentation.

Are Chinese-made solar inverters a supply-chain vulnerability?

Leading renewable energy operators worldwide are confronting a disturbing supply-chain vulnerability: undocumented communication modules found in Chinese-made solar inverters and batteries.

Where are solar inverters made?

These inverters link solar panels, wind turbines, and batteries to electric grids and are primarily manufactured in China. While they are designed for remote updates, U.S. utilities typically install firewalls to prevent unauthorized access.

Despite typical safeguards, including firewalls against direct communication, rogue communication devices have been uncovered in several Chinese solar inverters, raising ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including ...

Alarm bells have been ringing in the United States and Europe after investigators uncovered unlisted communication modules ...

Alarm bells have been ringing in the United States and Europe after investigators uncovered unlisted

communication modules embedded in Chinese-manufactured inverters -- ...

Investigations have revealed that certain Chinese-made solar inverters and batteries contain undocumented communication modules, including cellular-like mechanisms.

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

An unidentified illegal communication device has been found in Chinese solar inverters, prompting U.S. energy authorities to reevaluate security risks for renewable energy ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy ...

Korea is taking concrete steps to assess the potential security risks posed by China-made inverters, key in solar panels and batteries, ...

An in-depth analysis for executive leadership and board members on undisclosed communication devices in Chinese-manufactured inverters, and why immediate action is ...

U.S. energy officials are reportedly reassessing the security risks posed by Chinese-made components in renewable energy infrastructure after discovering hidden ...
