Sao Paulo, March 2023 - According to the Brazilian Photovoltaic Solar Energy Association (ABSOLAR), based on the data of the International Renewable Energy Agency ...

Since 2012, the solar sector has attracted more than BRL 2 billion in investments for the district, generating around 12 jobs and contributing to R\$600 million for public coffers. ...

With one of the largest production lines globally, the company produces a variety of solar panels, making it a key player in the Brazilian solar panel manufacturing sector.

Entering Brazil's growing solar market? This guide analyzes the strategic choice between local sourcing and importing components to ...

Entering Brazil's growing solar market? This guide analyzes the strategic choice between local sourcing and importing components to optimize costs and incentives.

The Brazilian Atlas of Solar Energy provides a survey of the solar energy availability in Brazil, using over 17 years" satellite data and a radiative transfer model.

Solar energy in Brazil surpassed the 55 GW milestone in March 2025, more than doubling its photovoltaic (PV) count in the last few years. That breakneck expansion is reshaping Brazil's ...

Brazil has taken a significant step in this direction with the production of TOPCon N-Type bifacial glass-glass solar modules ...

Brazil has taken a significant step in this direction with the production of TOPCon N-Type bifacial glass-glass solar modules featuring the lowest CO2 footprint in the world.

These records highlight the growing importance of solar energy in Brazil's energy landscape and its potential to soon become a major force in the country's energy transition.

Pirapora Solar Complex, one of the largest in Brazil and Latin America, with a capacity of 321 MW. In 2016, a factory capable of producing 400 MW of solar panels a year opened in ...
