Since 2013, Altech, a Congolese-owned solar home system company, has been lighting homes in some of the remotest parts of the Democratic Republic of the Congo (DRC).

This power station is expected to diversify electricity sources in DRC, where solar power accounted for 20 MW out of a total of 2.9 GW of installed capacity as of December 2022.

JNTech's hybrid solar-diesel microgrid systems are at the forefront of transforming the DRC's energy landscape. With continued ...

Acknowledgements International Rivers acknowledges the researchers and experts, Drs Ranjit Deshmukh, Ana Mileva and Grace Wu, who gathered and analysed the data presented in the ...

a/yr Indicators of renewable resource potential Solar PV: Solar resource potential has been divided into seven classes, each representing a range of ann. al PV output per unit of capacity ...

The Africa Finance Corporation (AFC) and SkyPower Global have signed a joint development agreement to implement the first phase of an ultimately 1 000 MW capacity solar ...
