---

It is Southeast Asia's largest and the world's third-largest floating solar plant, a collaboration between Indonesia's state-owned PLN and Abu Dhabi-based Masdar.

By geography, Vietnam commanded 58.5% of the capacity in 2024; however, Brunei is projected to post a 103.6% CAGR to 2030, the ...

The arrival of factories backed by Chinese solar heavyweights such as Trina, Longi, JA Solar and Jinko Solar, among ...

Modular container PV systems disrupt traditional solar installations by enabling mobile, scalable, and standardized deployments. Prefabricated in controlled factory environments, these ...

Despite strong ambitions, PV module manufacturing in Southeast Asian is currently under pressure. Operational capacities have been significantly reduced or temporarily halted, ...

The market for alternative renewable energy is expanding extensively in Southeast Asia, where hundreds of millions are without reliable electricity. Off-grid solar container ...

Meet the energy storage container - Southeast Asia's unsung hero in the energy transition. These modular powerhouses are reshaping how the region stores and distributes ...

Once considered viable alternatives to China for solar manufacturing, Southeast Asian countries like Vietnam, Thailand, and ...

Major Chinese photovoltaic firms such as Jinko Solar, Trina Solar, LONGi Green Energy, JA Solar, CSIQ, and ET Solar have established integrated capacities for wafers, cells, ...

Once considered viable alternatives to China for solar manufacturing, Southeast Asian countries like Vietnam, Thailand, and Cambodia are now facing significant disruptions.

The arrival of factories backed by Chinese solar heavyweights such as Trina, Longi, JA Solar and Jinko Solar, among nearly 20 other competitors, has transformed ...

The five major PV markets--Vietnam, Thailand, Malaysia, the Philippines, and Singapore--are set to boost Southeast Asia into a major PV market with strong policy push.
