Choose CableFree's compact, software-defined 4G & 5G LTE base station for indoor installation. Supports narrowband IoT. For enhanced performance & flexibility.

Indoor small base stations ensure consistent signal strength, reducing dropped calls and buffering issues. Companies report up to 30% productivity gains due to fewer ...

CableFree offers a range of 5G Small Cells which include Baseband and RF functions in a single compact units. Available in Outdoor and Indoor versions and in versions to cover all FR1 ...

The higher bandwidth required of 5G connections limits the range of base stations, necessitating a higher density of antennas, especially in buildings where radio signals have limited penetration.

In 5G NR (New Radio) technology, the base station is referred to as gNodeB or gNb. 5G gNodeB base stations are critical for ensuring seamless network coverage and high-speed data ...

The CableFree 4G/5G LTE Base Station includes Remote Radio Head (RRH) which typically feature 2x2 or 4x4 MIMO, which are co-located on the tower with the Sector Antennas.

The advanced reconfigurable technology used in CableFree 4G & 5G base stations is highly flexible but certain combinations of bands and modes may require extra hardware, have ...

The advanced reconfigurable technology used in CableFree 4G & 5G base stations is highly flexible but certain combinations of bands and modes ...

Key Features shopping malls to stadiums and other indoor venues. The fully integrated small cell combines
