"These stations will be the first domestic solution aimed not only at the Russian market, but also at international expansion," MTS said. During the exhibition, an active 5G ...

"These stations will be the first domestic solution aimed not only at the Russian market, but also at international expansion," MTS ...

In this third phase, the focus will be on the improvement and testing of operations with the help of equipment developed and manufactured in Russia and which is compatible ...

Despite the sanctions, we have completed our project exactly as planned, so Russia now stands on the cusp of deploying its own 5G networks. Our project brings us closer ...

The government has set an ambitious goal: by 2029, all GSM, LTE, and 5G base stations installed by domestic operators will be exclusively of Russian manufacture.

They are mobile facilities which house solar panels, inverters, and storage systems in a mobile box, enabling adaptive power supply, especially in remote areas.

"The active deployment of 5G networks at domestic base stations will begin in 2026 in large Russian cities," the minister said, noting that preparatory work to launch the ...

MTS has completed bench tests of a prototype 5G base station using NTN (Non-Terrestrial Networks) hybrid non-terrestrial cellular technology with simulated smartphone ...
