When will Enel's solar energy token go live?

Speaking to Cointelegraph, Vanlerberghe said the product will go live with an initial group of clients on Jan. 24. The tokenized product will allow Italians to own a portion of Enel's solar farms and use the generated power to offset the electricity usage of residential properties.

Can solar panels offset electricity bills?

Owners can offset electricity bills using energy generated from the solar panels. Several novel use cases have emerged across the tokenization market over the past years. Italian green energy company Enel Group has entered the tokenization market to launch fractional ownership of solar panels on the Algorand blockchain.

Is Conio launching a solar-panel tokenization product in Italy?

On Jan. 21, Algorand Foundation chief marketing officer Marc Vanlerberghe announced a partnership between Conio and Enel Group that will launch a solar-panel tokenization product in Italy. Speaking to Cointelegraph, Vanlerberghe said the product will go live with an initial group of clients on Jan. 24.
