-----

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 ...

But are these energy storage options arriving quickly enough? Why is storage so important?

Data published by RenewableUK just over two weeks ago showed that the amount of energy storage projects in the UK that are operational, under construction, consented or ...

Operational battery storage capacity has grown to 4.4 GW, and the capacity of projects under construction has reached 4.3 GW. A further 30.4 GW has been consented, 26 ...

Utility-Scale Battery Storage - Ireland Completed Assets & Pipeline Database Battery StorageTech Bankability Ratings Report Green Hydrogen - UK Completed Assets & Pipeline ...

Data published by RenewableUK just over two weeks ago showed that the amount of energy storage projects in the UK that are ...

There has been a shift in the pipeline for current and future long duration electricity storage (LDES), from over 7.2GW in December 2023 to 10.5GW in May 2024. In January, the ...

The UK saw a slowdown in both BESS installations and submitted applications in 2024, while applications in Ireland grew by capacity.

From the caverns of Teesside and the reservoirs of Scotland to futuristic cryogenic tanks near Manchester, the UK is assembling a flexible, secure and low-carbon energy storage landscape.

As a driver of the energy transition, RWE develops, builds and operates battery storage systems in the USA, Europe and Australia. The company currently operates battery ...

Ofgem has launched a new cap and floor investment support scheme, unlocking billions in funding to build major Long Duration Electricity Storage projects for the first time in ...

The recent development of the UK's energy storage industry has drawn increasing attention from overseas practitioners, achieving significant progress in recent years.
