Our DC UPS systems supply power to the coils or the motorized switchgears. Appropriate battery sizing and charger rating are selected to deliver 10-hour battery autonomy and a maximum of ...

You can reduce the chance of downtime and equipment damage with an uninterruptible power supply at the source, as well as downstream installations that keep relay stations up and running.

Our DC UPS systems supply power to the coils or the motorized switchgears. Appropriate battery sizing and charger rating are ...

Currently, PULS offers two options for an uninterruptible power supply to the load in an emergency: both double-layer capacitors ...

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with integrated power supply or integrated battery ...

The UPS uninterruptible power supply and the DC operating power supply system together form a dedicated uninterruptible power supply for power plants and substations.

Select the appropriate power supply, uninterruptible power supply, and battery module for your application. Furthermore, our UPS modules with ...

Some systems at the substation may require lower voltages as their auxiliary supply source. A typical example of these systems would be the optical telecommunication ...

The SDU DC UPS is a powerful, microprocessor controlled UPS that provides protection from power

interruptions. With an input voltage range of 22.5 to 30.0 Vdc, the DC UPS is the ideal ...

Whether it be in support of IT, communications, medical or manufacturing equipment, Mitsubishi Electric has a UPS designed for continuous power ...

Some systems at the substation may require lower voltages as their auxiliary supply source. A typical example of these systems would ...

In a world where power disruptions can cripple operations in seconds, Uninterruptible Power Supply (UPS) systems are indispensable. These systems provide a ...
