Vienna has implemented its photovoltaic initiative in record time: The target of 250 megawatt peak (MWp) solar power capacity was reached ten months earlier than planned.

Wien Energie built Vienna's first collective PV system allowing households to collectively produce, use and resell renewable electricity. Wiener Linien is working alongside Wien Energie to test ...

It's all courtesy of the sun: The Vienna Solar Power Campaign creates a fundamental framework for the expansion of photovoltaics and has boosted photovoltaic installations and output ...

The initiative continuously works to improve the framework for installing PV systems in Vienna. Administrative procedures are being simplified, optimised, and accelerated, and legal ...

A large battery storage with five megawatts stores the solar power from Vienna's largest photovoltaic system on Schafflerhofstrasse and feeds it into the grid.

The plans for what the initiators claim will be the largest inner-city photovoltaic system to date were presented in Vienna on Monday. It will be built at Vienna's Westbahnhof ...

Currently, Wien Energie's facilities generate green electricity for around 770,000 households in Vienna. "With a record expansion of photovoltaic energy and a 50% increase in ...

The strongest net electricity producer was wind power, followed by photovoltaics, which increased its production by 21 percent and thus overtook lignite for the first time.
