How did the signal troops in Vietnam support the Vietnam War?

The signal troops already in Vietnam would have to improvise the needed support. Communications service into the system of Vietnam was provided by installing mobile radio relay links connected to the backbone system. Only limited telephone and message service could be made available.

Was the enemy in Vietnam able to intercept radio communications?

David M. Fiedler - They Assumed the Enemy in Vietnam Was Incapable of Intercepting Radio Communications. They Were Wrong. [Internet].

When did the strategic communications command take over Vietnam?

As a result, on 1 December 1965 the Department of the Army placed the Strategic Communications Command's elements in Vietnam under the operational control of the Commanding General, US Army, Vietnam.

Who is responsible for long-line communications in Vietnam?

These arrangements, as previously discussed, charged two separate US Army Strategic Communications elements in Vietnam, both under command of their headquarters in Hawaii and both subject to Defense Communications Agency direction, with responsibility for long-lines circuits in Vietnam.

The war in Vietnam dramatically tested the responsiveness of communications operators to the various demands of tactical combat as well as counter-insurgency operations.

During the 1965 buildup of U.S. troops in Vietnam, telephone systems sprang up wherever headquarters, base camps, logistics centers, and air bases were established.

Explore how communication and signal interception shaped Vietnam War combat tactics, revealing key techniques, technological advances, and strategic impacts.

The scope of this study includes the stateside alert and readying of units for Vietnam duty and the reaction of

the Army training base to supply the volume of trained specialists needed to man...

base at Phu Lam, on the western outskirts of Saigon, were among those support troops, mission of providing reliable, secure, strategic communication forces in Vietnam. The men at Phu Lam ...

The Vietnam War (1959-1975) saw the peak of analog military communications potential. Airmobile communications closely tied ground troops to their air support.

During the 1965 buildup of U.S. troops in Vietnam, telephone systems sprang up wherever headquarters, base camps, logistics centers, and air bases ...

It Shouldn't Have Been A Surprise A Blessing and A Curse The Call Sign Problem Yes, Communist Intel Operatives Understood English Predicting American Moves Simple Enemy Technology Eavesdropping at IA Drang Lessons Learned and Not Learned The enemy radio intercepts shouldn't have been a surprise. There had been warning signals for years. In the late 1950s the Army directed its Electronics Command at Fort Monmouth, New Jersey, to develop a new "family" of single-channel tactical field radios to replace the obsolete inventory of World War II and ...
