Semantic Scholar extracted view of "A Control Method for Uninterruptible Power Supply in Weak Current Systems Based on Virtual Impedance" by Yalei Shang N.A.

The invention relates to a building weak current power supply system, in particular to an independent intelligent building weak current power supply system. A mains supply power...

In this project, monitoring system for UPS was designed by using visual basic (VB) to provide a safe and constant 12V DC supply in the case of power disruption.

This paper suggests an intelligent, robust control technique with closed-loop voltage sensing for UPS (uninterruptible power supply) ...

In this project, monitoring system for UPS was designed by using visual basic (VB) to provide a safe and constant 12V DC supply in ...

In order to optimize the energy used by an Uninterruptible Power Supply (UPS), VertivTM has developed proprietary technologies named Intelligent Paralleling for monolithic UPS and ...

Abstract: If there is a significant voltage control error in the uninterruptible power supply (UPS) of weak current systems, it will seriously reduce the stability of the power supply. Therefore, a ...

This project is aimed at developing an intelligent uninterruptible power supply stabilizer for use in small scale industrial operations.

Analog Devices" solutions enable highly efficient, intelligent industrial UPSs with high power density.

Weak current intelligent uninterruptible power supply

Website: <https://prawnikpabianice.pl>

Industrial UPSs provide a stable supply of power in the absence of the mains power ...

Finally, virtual impedance is used to suppress the inverter circulating current of the UPS in the weak current system, thereby completing the control of the UPS. The experimental ...

This paper suggests an intelligent, robust control technique with closed-loop voltage sensing for UPS (uninterruptible power supply) inverters in IoT (internet of things) ...

It is a system device that connects the battery to the host and converts DC power to mains power through module circuits such as the host inverter. It is mainly used to provide a ...
